

Partnership Programs

Nursing & Allied Health CENTER OF EXCELLENCE

WCTC Partnership Programs

- Clinical Laboratory Technician
- Pharmacy Technician
- Physical Therapy Assistant
- Radiography

What is a Partnership Program?

Waukesha County Technical College has partnership agreements with other Wisconsin Technical College System colleges to offer selected allied health programs. Through the partnership agreements, the “host” college offers the program, but saves slots for students from WCTC and other cooperating colleges.

How Does a Partnership Program Work?

WCTC students who enroll in partnership programs may enroll in general education courses at WCTC. Most major coursework is taken through the host college via videos, distance education and/or traveling to the host college. Clinical work will be performed either in the WCTC district or host college district, depending on the program of study. Students enrolled in partnership programs will graduate from the host college, not WCTC.

How to Get Started

To receive more information about specific curriculum for partnership programs or admissions requirements, please contact a WCTC counselor at 262.691.5400.

Clinical Laboratory Technician

69-credit Associate of Applied Science Degree

About the Partnership Program

The clinical laboratory technician (CLT), also known as a medical laboratory technician (MLT), performs analytical procedures of blood and other body fluids, under the supervision of a medical technologist or physician. Through a consortium effort, this Milwaukee Area Technical College program is being offered at WCTC. Students will work under the supervision of a medical technologist or physician in a variety of procedures, including collection and analysis of blood and other body fluids in such areas as hematology, chemistry, immunology, therapeutic drug monitoring, and microbiology. Students will also

learn to perform routine analytical procedures, recognize the importance of quality control, and exercise accepted safety precautions in the collection and handling of clinical specimens.

This program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences. Graduates are eligible to write national certifying examinations.

Potential Job Titles

- Clinical Laboratory Technician
- Medical Laboratory Technician
