■ HEALTH

Caregiver | 1 credit

Learn to provide high-quality care for someone with special medical or other needs. Begin with basics in personal care, light housekeeping and companionship. Then, explore more advanced skills in adapting to different working environments and maintaining safe and healthy spaces.

Introduction to Health Careers | 8 credits

Explore the various roles and responsibilities within the healthcare industry and discover potential careers that match your skills and interests. Develop the soft skills, organizational methods and self-management techniques of a successful health professional.

Medication Assistant | 3 credits

This competency-based certificate is designed for certified Nursing Assistants who will, upon completion, be involved with administration/distribution of medications to residents in a skilled care nursing facility. Employer approval, proof of work experience and a pre-enrollment assessment are required.
