

IT - Cloud Technical Solution Specialist

27-credit Technical Diploma

www.wctc.edu/cloud-tech

If you enjoy solving problems, are skilled at multi-tasking and have strong analytical skills, the world of cloud technical solutions may be for you. Those in this field are constantly learning new technologies as cloud technology continues to evolve.

About This Program

Learn to research, implement, manage, maintain, monitor and troubleshoot a secure cloud infrastructure essential for day-to-day business operations. Leverage cloud services to meet business objectives, and explore cloud security, cost, core services and business continuity. Implement the visibility of data for governance and auditing.

Career Salaries

Salary data not yet available

Salary range estimates based on wages for related occupations in Waukesha County as reported by Economic Modeling Specialists International (EMSI). Individual wages may vary based on experience, industry, location and specific job requirements.

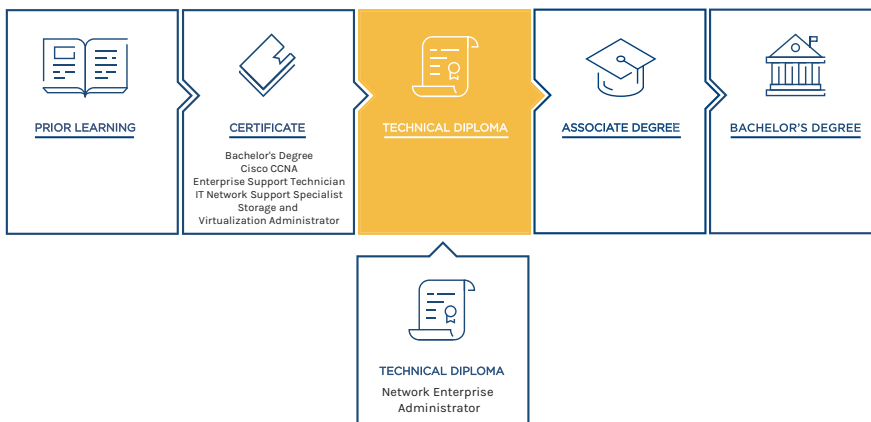

Potential Careers

- Cloud Analyst
- Cloud Administrator
- Cloud Systems Engineer
- Cloud Platform Associate

What Makes This Program Unique

- Understand the differences between AWC and Azure Cloud providers to clarify requirements, suggest improvements, and package services and tools for cloud solutions.
- Learn how to provide IT solutions to companies in both on-premise and cloud environments.
