

# Phlebotomy Technician

16-credit Technical Diploma

[www.wctc.edu/phlebotomy](http://www.wctc.edu/phlebotomy)

If you have good hand-eye coordination, pay attention to detail and have a knack for making others feel at ease, a career as a phlebotomy technician might be right for you. Those working in this field need to be compassionate and calm under pressure as those who are having blood drawn may feel uncomfortable or anxious.

## About This Program

A phlebotomy technician's primary responsibility is drawing blood and conducting other specimen collections. They must recognize conditions that might alter collections, correlate types of lab tests to the written diagnosis, and communicate with the lab and patients. Learn to draw blood from a patient for laboratory analysis, understand lab test requirements and maintain specimen quality.

### Career Salaries

\$36,000 - \$45,600 annually

Salary range estimates based on wages for related occupations in Waukesha County as reported by Economic Modeling Specialists International (EMSI). Individual wages may vary based on experience, industry, location and specific job requirements.

### Potential Careers

Donor Specialist  
Medical Laboratory Technician  
Phlebotomist  
Phlebotomy Technician

## What Makes This Program Unique

- Upon program completion, students will be prepared to take the Phlebotomy Technician Certification (CPT) exam.
- Students can obtain employment in hospitals, clinics and specimen collection agencies.
